allCOLOR **STANDARD USE**
Colored lens with colored light source.
The use of a colored lens with the same-color light source allows optimization of the emission frequency producing a rich intense light output

allCLEAR **USE IN VERY BRIGHT ENVIRONMENTS**
Clear lens with colored light source.
In very bright environments it is possible that the ambient brightness lights up the module when it is switched OFF creating problems in distinguishing between the ON and OFF state of the stacklight (phantom effect). The clear lens module allows clear distinction between the ON and OFF status of the stacklight
