

DESCRIPTION

The M-45 modular support can be used to realize electronic equipments to be directly mounted on DIN guide. The support is composed by several elements of different measures. According to needed size and available dimensions, the different elements can be interlocked together so to obtain a complete support. Base elements are available in measures of 11.25mm, 22.5mm and 45mm in addition to these there is the lateral closure of 11.75mm size.

By the interlocking of two lateral closures, the smallest support (23.5x45) is obtained.

One or more hook elements are provided in relation to the size of the final complete support needed.

Main features are:

- quick mounting, thanks to the modularity;
- final mounting on EN guides thanks to the universal hook element;
- marking possibility in correspondence of the lateral closures;
- possibility to insert pc boards up to 1,9mm thickness;
- outside connecting possibility by using the wide range of euroclamp terminal blocks and connectors;
- other colours available on request.

MATERIALS

housing: PA - UL 94 V0

AVAILABLE COLOURS
